

Case Study

PROJECT NAME: A82 UPGRADE

PROJECT TYPE: WATCHING BRIEF

CLIENT: ENVIRONMENTAL SCIENTIFICS
GROUP

DATE: NOVEMBER 2014

Neo Environmental were commissioned by Environmental Scientifics Group to conduct an archaeological watching brief as part of the A82 Tarbet to Inverarnan Upgrade preliminary site investigations.

Neo Environmental's involvement:

Neo Environmental as clerks of works provided archaeological monitoring for the excavation of 27 trial pits at various locations along the proposed route.

Project Outcomes:

- All trial pits were successfully monitored and a full report of the results was collated, supported by a documentary and photographic record.
- Monitoring of the trial pits enabled the client to conduct investigation into the underlying geology of the A82 whilst mitigating any potential impact on potential sub-surface archaeology.
