

Case Study

PROJECT NAME: FAWKES 1

PROJECT TYPE: GEOPHYSICAL SURVEY

CLIENT: TULIP RENEWABLES LTD

DATE: AUGUST 2015

Neo Environmental were commissioned by Tulip Renewables Ltd to conduct a geophysical survey as part of the archaeological investigations preceding the proposed solar farm.

Neo Environmental's involvement:

Neo Environmental provided a geophysical survey at the site in order to investigate potential buried archaeological remains.

Project Outcomes:

- The geophysical survey identified a number of potential buried archaeological and naturally occurring features.
- The results of the survey show the agricultural land management over time and informs any further archaeological work required on the site.
