

## Case Study

**PROJECT NAME:** MOLEHILL

**PROJECT TYPE:** SOLAR FARM

**PROJECT SIZE:** 15MW

**CLIENT:** THE FARM ENERGY PARTNERSHIP

**DATE:** APPROVED MAY 2014

Neo Environmental were commissioned by Farm Energy Partnership to produce all the environmental reports to support a planning application for a 15MW solar energy development near Canterbury.

### Neo Environmental's involvement:

Neo Environmental conducted the following assessments for the development:

- LVIA
- Heritage Impact Assessment
- Ecological Appraisal (including Phase 1 Habitat Survey)
- Biodiversity Management Plan
- Agricultural land Classification Assessment
- Flood Risk Assessment
- Geophysical Survey

### Project Outcomes:

- No significant impacts were identified.
- The project was consented at committee following a recommendation for approval from the planning officer.
- A stringent program of archaeological investigations was conducted by Neo Environmental as part of the development conditions, with all archaeology fully resolved.
- The development has been fully constructed and is operational.
